### HOW TO FILL IN YOUR BLADDER DIARY

- 1. Please complete your bladder diary over three days, (three 24 hour periods).
- 2. These do not have to be consecutive days. Choose convenient days.
- 3. Measure the residual volume you get by Intermittent Self Catheterisation. You will be instructed how often to perform this.
- 4. Then discard all urine.
- 5. It is recommended you purchase a 1 litre plastic jug for this purpose.

### WHAT ELSE SHOULD I KNOW?

This chart is an important part of your assessment. Please bring it with you to your next visit or return it by email to: info@continencematters.com
